- Each diameter has a unique height to allow for individual design layouts
- Identical illuminance provided by all 3 diameters
- Integral 120 volt driver
- 2 piece cast aluminum construction with steel mounting plate

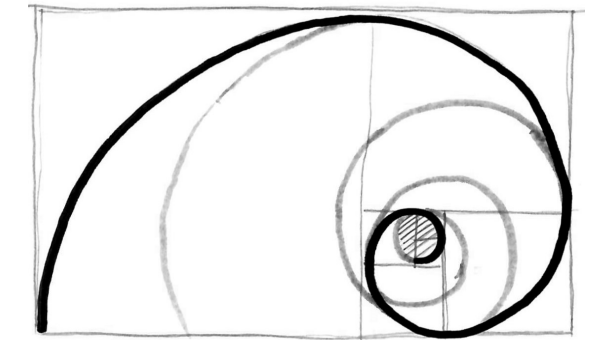

LAMP

By Experience Brands USA

The concept of Mun Dark was inspired based on a basic universal geometry - a point.

A point which grows in accordance to the Fibonacci spiral using the Fibonacci numbering method beginning with 60 to arrive at the 120mm, 180mm, and 300mm diameters.

Mun Dark is a contemporary indirect lighting luminaire providing a “splash” of light on the surface behind. It may be used either as a way marker or as an artistic pattern for accent lighting.

The varying diameters, each with its own unique height, allow the designer to closely space the luminaires and even overlap the shades as desired to create visual contrast.
